You may find that the **default page layout settings** in Word are not sufficient for the document you wish to create, in which case you will want to modify those settings. For example, if you are printing on a different paper size, you'll want to change the document page size to match the paper. In addition, you may want to change the **page formatting** depending on the type of document you are creating.

In this lesson, you will learn how to change the **page orientation**, **paper size**, and **page margins**.
