

Going Green Plan for 2011

Going Green

Step 1: Reduce

Switching to Electric Hand Dryers

- Installing electric hand dryers in the bathrooms and the break room.
- This will reduce waste from paper towels.
- It will also save money over the long term.

Going Green

Step 2: Reuse

Donating Old Computers

- We will be donating all our old computers to local schools.
- This will keep the computers out of landfills.

Going Green

Step 3: Recycle

Using Recycled Toner Cartridges

- We've found a company that makes recycled toner cartridges.
- About the same price as the ones we currently use.
